IBM Proprinter X24 and Proprinter XL24

Making both you and your work look good

The IBM Proprinter™ X24 and Proprinter XL24 are just as hardworking and versatile as other members of the Proprinter family, and they use 24-wire technology to give a crisper, more vivid look to whatever you print.

Designed and manufactured by IBM to maintain high standards of quality and reliability, these letter quality printers give you professional-looking text at high speeds. And they print all-points-addressable graphics that can help you add impact to your documents.

The 24-wire difference. With their 24-wire dot matrix printheads, these printers generate sharp, quality text and visuals you can use in your important reports and presentations.

And they do it quickly, too. Letters, memos, manuscripts, spreadsheets and more can be printed at speeds of up to 240 cps in draft mode and 80 cps in letter quality mode.

Keeping online fonts on hand. With IBM Proprinter X24 and Proprinter XL24, you have four popular type fonts to choose from:

- Courier 10
- Courier Proportional
- Draft 10
- Prestige Elite 12

But if that's not enough, you can add as many as 11 more—one at a time—from a special diskette.

Convenient paper handling. The IBM Proprinter X24 and Proprinter XL24 wouldn't be part of the Proprinter family without such flexible paper handling conveniences as:

- Integrated adjustable tractor feed for using continuous forms paper.
- Front load slot to feed cut sheets manually.
- Optional automatic sheet feed to load single sheets for printing multipage documents.

IBM

Highlights

Here's a quick look at what the IBM Proprinter X24 and Proprinter XL24 have to offer.

50 to 100% greater throughput in draft mode than the current best-selling, comparably priced 24-wire printers, according to an independent test.

Front load slot allows you to manually insert single sheets without removing the cut sheet feed or continuous forms paper.

Two printing choices let you produce letter quality text for outgoing correspondence and draft quality text for internal documents that need to be routed quickly.

Operator control panel allows you to conveniently select print modes, print speeds or pitches.

Built-in, variable-width tractor makes it possible to handle continuous forms paper without purchasing any additional options.

All-points-addressable graphics produce sharp visuals that lend an added dimension to business reports.

Four resident fonts and an optional diskette let you keep a variety of type styles at hand.

Standard IBM PC Parallel Interface and optional Asynchronous Serial Interface allow the printers to work with IBM Personal System/2™ models, most IBM Personal Computers, and many non-IBM personal computers with a compatible interface.

Wide range of software compatibility enables the printers to operate with many popular IBM and non-IBM PC software programs.[1]

"Clean-hands" ribbon cartridges snap in and snap out so you avoid getting ink on your fingers.

IBM Proprinter XL24's wide carriage accommodates a print line as wide as 13.6 inches for spreadsheets and budgets.

Automatic sheet feed option lets you print documents as long as 100 pages without reloading paper.

What you get

Both the IBM Proprinter X24 and Proprinter XL24 come with:

- Guide to Operations
- Ribbon
- Power cord
- Separator for continuous forms
- Setup mode label

Options

The following options are available for the IBM Proprinter X24 and Proprinter XL24:

- FontSet™
- IBM Proprinter X24 Automatic Sheet Feed
- IBM Proprinter XL24 Automatic Sheet Feed
- Asynchronous Serial Interface Module (serial attachment cable required)
- 6' Parallel Attachment Cable

Warranty/Service

Every IBM Proprinter X24 and Proprinter XL24 is designed and manufactured to meet IBM's high standards of quality and reliability.

Each IBM Proprinter X24 and Proprinter XL24 is backed by a one-year limited warranty. Post-warranty service options are available. For additional warranty or post-warranty information, contact your IBM Authorized Dealer or your local IBM Marketing Representative.
